Dhuwarakesh R

Company : Stepping EDGE Technologies, Coimbatore

Web Developer

Responsibilities:

- Responsible for developing WebApps.
- Responsible for prioritizing the work with the team.
- Understanding the Business Requirement Specifications.
- Verifying the code based on the Requirement.

Project Name: 123EZAlerts

Technologies Used: Laravel, MySQL, Bootstrap, jQuery.

Description:

A powerful software solution that revolutionizes the way healthcare organizations approach compliance. As a key partner in your healthcare journey, we focus on three vital aspects: enhancing communication, reducing Corrective Actions (CAs), and boosting patient outcomes. Designed for seamless integration across all healthcare sectors, including hospitals, private physician groups, ambulatory surgical centers, assisted living facilities, group homes, and nursing homes, 123EZAlerts takes the stress out of compliance management. Our unique alert system, built on AWS, ensures HIPAA compliance, safeguarding your Protected Health Information (PHI). Role-based notifications, shift risk questionnaires, and multimedia alerts offer a seamless flow of communication, keeping every member of your team informed and involved.

Responsibilities:

- Understanding the Business Requirement Specifications.
- End to end software/application development which includes analysis, designing, coding, debugging.

- Developing and designing the website according to the wireframes.
- Reporting client regarding the process and status.

Project Name: JOB POST APPLICATION

Technologies Used: React js .

Description:

IAT is a strategic site, which provides the capacity to match unseen, highly qualified candidates with their dream jobs and it provides all the aviation solutions that need for continuous growth to their clients. It maintains three users such as Employers, Candidates and Super Admin and it began as an aviation consulting company, partnering with a wide variety of clients to implement and execute tailored consulting solutions for short-term and long-term project needs.

Responsibilities:

- Understanding the Business Requirement Specifications.
